Email: khuyen.dev183@gmail.com | Github: poiuyt183 | LinkedIn: hoshikira | Facebook: hoshikira18

GENERALS

- **Programming languages:** JavaScript, TypeScript, Golang.
- **Libraries:** ReactJS, TailwindCSS, Mantine UI, ShadcnUI.
- **Frameworks:** NextJS, RemixJS, ExpressJS, Tanstack, React Native.
- **Tools:** Git, Vercel, Cloudflare, Figma, Firebase, Supabase, Jira.
- **Languages:** Vietnamese, English.

EXPERIENCE

MOR SOFTWARE

FRONTEND DEVELOPER

Vietnam

Apr. 2025 -Feb. 2026

- Engineered the L1F3, SUNPOP application in React and React Native, converting Figma designs into fully responsive, production-ready interfaces across web and mobile platforms.
- Architected and maintained a shared library of reusable UI components, reducing duplication and ensuring design consistency across the codebase.
- Partnered with backend engineers to integrate REST APIs, triage bugs, and ship features within sprint deadlines in an Agile environment.
- Participated in weekly code reviews, improving team code quality and adhering to established engineering standards.

PROJECTS

SANGXANH

FULL STACK DEVELOPER

Vietnam

May. 2025 - Feb. 2026

- Developed a content-rich lighting e-commerce platform using Next.js SSR, improving initial page load speed and search-engine discoverability for a catalog of 500+ product SKUs.
- Built a high-performance RESTful API in Golang, handling product listings, inventory filtering, and order management with low-latency response times under concurrent load.
- Delivered a custom admin dashboard with Vite.js that empowered non-technical staff to manage all site content independently.
- Containerised the entire application stack with Docker & Docker Compose, enabling consistent environments across development and production and simplifying onboarding for new contributors.
- Implemented an automated CI/CD pipeline that runs linting, builds Docker images, and deploys to the cloud server (GCP) on every push to main — reducing manual deployment steps to zero.

APATEK	PM/FULL STACK DEVELOPER	Vietnam
<i>Aug. 2024 - Oct. 2024</i>		
• Led development of a responsive company showcase web app using Next.js, TailwindCSS, Prisma, and PostgreSQL deployed on Vercel. • Optimised Core Web Vitals and cross-device responsiveness, improving overall user experience and reducing bounce rates. • Live site: apatek.com.vn		

DMB INDUSTRIAL	PM/FULL STACK DEVELOPER	Vietnam
<i>Aug. 2024 - Oct. 2024</i>		
• Led development of a responsive company showcase web app (dmb.com.vn) using Next.js, TailwindCSS, Express.js, and PostgreSQL deployed on Vercel. • Optimised Core Web Vitals and cross-device responsiveness, improving overall user experience and reducing bounce rates. • Built and maintained backend services for dynamic content management, enabling the client to update product listings without developer intervention. • Live site: dmb.com.vn		

AWARDS

CODEFEST 2024 - THIRD PRIZE	<i>Sep. 2024</i>
• Led a 4-member team in CodeFest, a competitive programming and robotics challenge focused on autonomous bot navigation, opponent detection, and strategic eliminations; achieved 3rd place overall. • Facebook Post • Facebook Post	
NINJASHIN 2024 - SECOND PRIZE	<i>Oct. 2024</i>
• Product demo: Formill • Apply AI to implement a product that enhances the study experience.	

CERTIFICATES

JAVASCRIPT ALGORITHMS AND DATA STRUCTURE	<i>Feb. 2025</i>
• FreeCodeCamp • Link: Javascript algorithms and data structure Certificate	
PROJECT MANAGEMENT PRINCIPLES AND PRACTICES SPECIALIZATION	<i>Feb. 2025</i>
• University of Michigan • Link: Cert	

EDUCATION

FPT UNIVERSITY	SOFTWARE ENGINEER	Hanoi, Vietnam
• Major: Software Engineering • 70% Scholarship • GPA: 3.2		<i>Sep. 2022 - Now</i>
